SYSTEMS ENGINEER

Chicago, IL 60641 | [LinkedIn](#) | 312-394-9869 | ibrahim17neder@gmail.com

SUMMARY

Cloud focused Systems Engineer in the healthcare industry with experience administering Azure environments, identity platforms, and endpoint infrastructure. Proven ability to deploy and manage cloud resources, enforce security controls, and support production systems at scale. Strong foundation in Azure administration, automation, and operational troubleshooting.

WORK EXPERIENCE

Joint Commission

Systems Engineer Assoc.

OakBrook Terrace, IL

March 2026 - Present

- Administered Azure-integrated enterprise infrastructure focusing on identity, access control, and endpoint management using Entra ID, Intune, and Microsoft 365.
- Designed and implemented security controls, including Conditional Access, MFA, and Privileged Identity Management (PIM), to enforce least-privilege access and improve the organization's overall authentication security posture.
- Strengthened organizational security posture by analyzing Entra ID audit/sign-in logs and performing Exchange email tracing to investigate anomalous activities, successfully identifying and mitigating phishing threats and unauthorized access attempts.
- Managed Azure Entra ID identity lifecycles, Role-Based Access Control (RBAC) assignments, and group governance, ensuring secure role elevation workflows and consistent onboarding/offboarding processes.
- Led operational efficiency initiatives using ServiceNow reporting and AI-assisted insights to proactively identify and resolve root causes, resulting in a targeted 10% reduction in repeat or avoidable incidents.
- Participated in 10+ cross-functional issue reviews and root-cause analyses with infrastructure and security teams, contributing documented corrective actions that improved process maturity and reduced recurring incidents.
- Administered high-priority system incidents and service requests, ensuring 4-hour response SLAs and achieving $\geq 90\%$ overall SLA compliance through proactive platform management.

BISCSL

IT Support

Chicago, IL

October 2025 - March 2026

SignalWave Media

Support Engineer 2

Chicago, IL

March 2021 - June 2023

- Administered Active Directory, Entra ID, and conditional access policies
- Resolve complex system, application, and network issues escalated from Tier 1 support.
- Performed root-cause analysis for recurring incidents and participated in problem management initiatives.
- Collaborated with Infrastructure, Security, and Service Desk teams to improve platform reliability and end-user experience.
- Mentored and provided technical guidance to junior technicians and support staff.

SKILLS

- **Identity & Access Management:** Entra ID, Active Directory, RBAC, MFA, Conditional Access, Privileged Identity Management (PIM), Onboarding/Offboarding
- **Microsoft 365 & Endpoint Management:** Microsoft Exchange, Intune, Microsoft 365, Outlook, Teams, OneDrive
- **Cloud & Infrastructure:** Azure, Virtual Machines, DNS, VPN, Firewalls, NSGs, Storage, Resource Management
- **Automation & Scripting:** PowerShell, Terraform (IaC), Git
- **ITSM & Remote Support:** ServiceNow, N-Central, Zoom
- **Monitoring & Operations:** Azure Monitor, Log Analytics, Application Insights
- **AI:** Gemini, Claude, CoPilot, ChatGPT

TECHNICAL PROJECT

Cloud Portfolio Platform - Infrastructure as Code & CI/CD [GitHub](#) [Ibrahim Neder — Portfolio](#)

- Deployed a fully automated cloud infrastructure on Azure using Terraform, provisioning a Static Web App, Application Insights, Log Analytics Workspace and resource tagging.
- Implemented Infrastructure as Code (IaC) with modularized Terraform configuration files to enable repeatable, version controlled deployments across environments.
- Configured a GitHub Actions CI/CD pipeline to automatically build and deploy website updates to Azure Static Web Apps, achieving zero downtime deployments with 2 minute deployment cycles.
- Integrated Azure Monitor and Application Insights for comprehensive observability, enabling real time performance tracking, error monitoring, and centralized log analytics.
- Implemented remote state management using Azure Blob Storage backend with state locking, enabling secure, centralized state access across multiple environments while preventing concurrent modifications conflicts.
- Accelerated infrastructure development using Claude AI for Terraform configurations and automated documentation reducing deployment preparation time by 60% while maintaining security and compliance standards.
